

**What new will be built in the courtyard in the housing development “Pod Požární zbrojnicí“(housing development “Under the Fire Station”)?
The modern space for leisure time and coexistence of all generations**

A joint application of intimate courtyard in the area of the housing development “Pod Požární zbrojnicí“ was defined on a basis of common planning meetings with the participation of the public, municipal representatives and architects, which ran in 2008 – 2009.

In the global competition LivCom 2009 the whole project received a sum of money.

In the first phase of this project that was done in the past year, trees were cut on a basis of the professional dendrological survey.

And what shall be done in the next phase, which will be held this year? In the place of existing sandpit, in the middle of the courtyard, a lawn for leisure time with areas for motion and physical activities will be made. This place will retain a nature of a quiet intensively maintained residential lawn, where activities of all age groups allowing social contact across the generations will concentrate. There will be installed multifunctional game components for children of preschool age, rope elements for school-age children and facilities for sports activities for youth and adults (pétanque, ping-pong, basketball etc.) A closeable sandpit will be located in the middle of the area and will be surrounded by wooden platforms with benches. The shape of the residential lawn will fill the existing area of the courtyard and will be framed by the current cretaceous marly limestone path that will be reconstructed. The whole area will be furnished with benches, bicycle racks, garbage bins and sufficient number of bins with bags for dog excrements. The network of paths will be optimized and the whole area will be effectively illuminated.

Nowadays the Building Authority of Chrudim Municipality has issued a building permission for the whole project. Consecutively the tender for a building contractor is currently undergoing. The contractor will be chosen by the end of April and the work contract will be drawn-up, as well.
