

SUMMARY :

Communities of Cyberjaya are looking forward for a tolerant, diverse and prosperous intelligent city that provides a high quality of life and amenity for residents, businesses and visitors. Cyberjaya communities feel a strong sense of belonging and are empowered to participate in the opportunities available in Cyberjaya. We value our rich natural, cultural and urban heritage. By building upon this strong foundation and through our commitment to sustainability, cultural and civic collaboration, Cyberjaya is a flourishing and outward-looking city of which its communities are proud of.

Sepang Municipal Council plays a pivotal role in providing strong leadership for Cyberjaya communities. In partnership with federal government, state government, multinational and local companies, the Council continues to support a coordinated approach to economic and social development in Cyberjaya.

We are building a sustainable city — socially, environmentally, culturally and economically. We continue to deliver vital infrastructure, facilities and quality services. The role of the Council is to contribute to the well-being and quality of life for everyone who lives in the city. To do this we actively promote a whole city approach to social inclusion and cohesion, equality and diversity, community participation and integration of ethnic communities. We also continue to ensure that families and

individuals have access to a quality standard of sustainable housing in a safe and friendly neighbourhood.

Arts and cultural activities are fundamental to liveability, diversity and quality of life. Cyberjaya provides a platform for creative expression. Lim Kok Wing Creative University is internationally renowned for its cultural richness and artistic excellence and in recent years this natural creative energy has been greatly enhanced by students from other countries engaging in the arts and the cultural life of Cyberjaya. The Council continues to lead and support the development of culture, arts, sport and physical recreation in the Cyberjaya.

Cyberjaya has a unique urban form and structure giving it a special character and identity which is recognized internationally. This identity is expressed in the pattern of streets and urban spaces which has evolved as an intelligent and hi tech city.

We have made changes in the structure of committees and our organisation in order to streamline processes and ensure we achieve maximum value for every Cyberjaya tax money. We have established a service based approach and are building our budget and how we report to our communities. We know expanded growth, investment and employment are key issues for Cyberjaya communities and our plans have taken this into account. We also understand that people are our greatest asset and our people

need access to a vibrant community that supports our creative side in arts, culture and technology.

Together, we will ensure that Cyberjaya is a leading “green” city of Malaysia; a global city where workers, residents and visitors enjoy clean air and traffic-calmed streets; a city whose thriving business heart is supported by distinctive residential complexes, each with shopping within walking distance; and a city that is linked internally by clean, efficient public transport, walking and cycling paths, and externally connected to the wider world.

Cyberjaya achievements are based on a dedicated and talented staff and communities involvement who take great pride and rightly so in their work. The team must continue to raise the bar and push ourselves to reach higher, work harder and maintain continuous improvement. Our focused commitment is to be the best is what will make sure we are on track. Improvement will come with a collaborative team effort. Cyberjaya communities are looking forward to the challenges and changes ahead of us. Together we will make a difference.
